### **DETAILED ACTION**

1. Claims 1-12 are pending in the application.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 and 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-3 and 6-10, the terms ---a fluoroether compound having an alpha fluoroether moiety and lewis acid inhibitor ---- are indefinite since specific compounds and inhibitors are not defined. The applicants are suggested to include specific compounds and inhibitors which are enabled by the instant specification.

In claim 1, the term --effective stabilizing amount-- is indefinite since it is not clear what is being stabilized and how this stabilization is achieved?

#### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Strum (Anesth. Analg., cited on applicants form 1449).

Strum teaches that the degradation, absorption and solubility of volatile anesthetics in soda lime depend on water content. The beneficial effect of increased concentration of water content on decreasing the rate of degradation of various anesthetics such as

Art Unit: 1625

sevoflurane, isoflurane, enflurane, halothane and desflurane ( see tables 1-3 )

disclosed by Strum clearly anticipates the instant claims.

5. Claims 1, 3, 8 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dressing (Repertorium, cited on applicant's form 1449).

Dressing discloses anesthetic, Fluothane comprising 0.01% thymol ( see page 713 ) which clearly anticipates the instant claims.

### ***Double Patenting***

6. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

7. Claims 4, 5, 11 and 12 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 2, 3, 7 and 8 of prior U.S. Patent No. 5,990,176. This is a double patenting rejection.

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

Art Unit: 1625

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1-3 and 6-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No.

5,990,176. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the cited patent are directed to a specific species ( sevoflurane ) which are encompassed by the broad genus ( fluoroether compound having an alpha fluoroether moiety ) of the instant claims.
